

LUCERNE FIBRE PELLETS

Lucerne or **Alfalfa**, is a high protein forage crop grown either to cut and feed to livestock as fresh material, silage or cut, sun-dried and formed into convenient, palatable, dust free pellets. The nutritional composition of lucerne offers in one ingredient a balance of high quality protein with rumen by-pass qualities for dairy cows and ruminants and an energy source from both plant sugars (about 3% of dry matter only) and digestible fibre, plus a readily available calcium source.

These components make lucerne pellets an ideal protein source to balance cereals for all livestock. The fibre component makes lucerne an excellent supplement to feed to horses and ruminants where digestive physiology is dependent on good fibre intakes.

LUCERNE PELLETS

Caecal function is a key element in the health and well-being of horses, and a good reason to include **Lucerne Pellets** in their diet. Waste is minimised as stock cannot reject the high fibre stems which are so good for them.

LUCERNE HIGH ENERGY PELLETS

Combining the benefits of the protein, fibre and materials in lucerne with the energy of barley. A good option when a little more energy is required to improve condition prior to showing or for leisure horses in light work, and the professional stud sheep breeders choice for both health and condition

LUCERNE PELLETS

TYPICAL ANALYSIS

(will vary according to season and stage of growth)

Crude Protein	18% - 22%
Fat	1%
Crude Fibre	20% - 25%

INGREDIENTS

Manufactured from Canterbury grown lucerne, **Lucerne Pellets** contain only lucerne which has been hammer milled and pelleted with a little clay binder.

A safe, nutritional option when hard feeding is necessary.

FEEDING RECOMMENDATIONS

Offer feed in relation to pasture quality and other supplements being fed.

Horses	0.25 – 2kg
Calves	0.5 – 1kg
Dairy Cow	0.5 - 3kg
Sheep	0.25 - 0.5kg

LUCERNE HIGH ENERGY PELLETS

TYPICAL ANALYSIS

(will vary according to season and stage of growth)

Energy	11MJ/kg DM
Crude Protein	15%
Crude Fibre	14%

INGREDIENTS

Manufactured from Canterbury grown lucerne – a valuable source of fibre for a healthy rumen. For horses, hind-gut function, protein for muscle development and calcium for strong bones.

Barley - rich in energy to improve condition.

Plus a little clay binder helps binds toxins and strengthen the 12mm diameter pellets.

FEEDING RECOMMENDATIONS

Offer feed in relation to pasture quality and other supplements being fed.

Horses	0.25 – 2kg
Calves	0.5 – 1kg
Dairy Cow	0.5 - 3kg
Sheep	0.25 - 0.5kg
